

REMEMBERING THE LEGACY OF MALIBU ARCHITECT **MICHAEL E. BARSOCCHINI**

Continuing the legacy of their father, **Nick and Tony Barsocchini** bring together Malibu real estate expertise with next generation architecture. Their father, Michael E. Barsocchini, was an award-winning architect who designed many well-known buildings and showcase homes in the greater Malibu area. Incorporating innovative open floor plans into his clients homes, his signature designs included dramatic overhangs, high ceilings, skylights and seamless sliding doors and windows to maximize the ocean views. The Barsocchini homes of today pay tribute to Michael's innovation and emphasis on organic architecture. Collaborating on all aspects of design, **Barsocchini & Associates Designs** build beautifully creative living spaces that flow simultaneously from indoors to land and beachfront.
